

## How to Configure Email Alarm

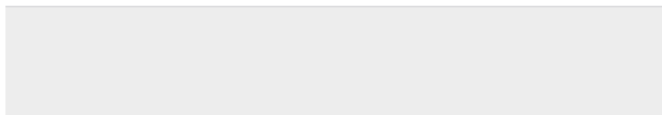

For different email boxes, information to be input can be different. In this document we take examples of Hotmail, Gmail, Yahoo Mail and Aol Mail to explain how to input information correctly.

### • Hotmail

To configure email alert with Hotmail, you may input email information by following below example:

< Back	Email Setting	Save
SMTP Server	smtp.live.com	
Server port	587	
Encrypt Type	STARTTLS >	
Authentication	<input checked="" type="checkbox"/>	
User Name	genbolt@hotmail.com	
Password	●●●●●●●●●●●●●●●●	
Send To	genbolt@hotmail.com	
Sender	genbolt@hotmail.com	
Subject	Camera alarm	
Message	<a href="#">Test</a>	

Motion detected by camera

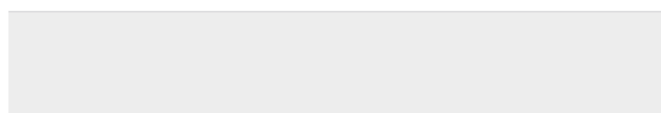

## • Yahoo Mail

In order to protect your email at higher security level, today may email providers like Yahoo Mail request to activate 2-Step Veri(ication and get Application Password if you hope to use email service in third-party applications. Here's the procedure to set email alarm with Yahoo Mail :

1. Entrer your Yahoo Mail box with navigator.
2. Click on Settings button on top to the right of the page, clic on Account Parameters.
3. Choose Account Security and switch on 2-Steps VeriAication, following online procedure to Ainish activation of 2-Steps VeriAication.
4. After activation of 2-Step VeriAication, you'll be able to create Application Password in Account Security. Save your Application Password and use it in application to replace your original email password.
5. Following below example to input information in app

< Back	Email Setting	Save
SMTP Server	smtp.mail.yahoo.com	
Server port	465	
Encrypt Type	SSL >	
Authentication	<input checked="" type="checkbox"/>	
User Name	genbolt@yahoo.com	
Password	•••••••••••••••• <b>***Application Password instead of original password</b>	
Send To	genbolt@yahoo.com	
Sender	genbolt@yahoo.com	
Subject	Camera alarm	
Message	<div>Test</div>	

Motion detected by camera

- **Gmail**

Gmail also requires to activate 2-Step Veri(ication and use Application Password if you hope to use Gmail in third-party applications.

Here's the ofAicial link explaining how to activate 2-Step VeriAication for Gmail:

<https://support.google.com/accounts/answer/185839>

Here's the ofAicial link explaining how to generate Application Password for Gmail:

<https://support.google.com/accounts/answer/185833>

Following below example to input information in application:

< Back	Email Setting	Save
